Project Name	Crowd Funding Platform
Work Completed (One-Line Summary)	Completed the backend environment setup and configuration, while redesigning the Figma prototype and enhancing the UI and UX of the Crowdfunding Website.

- Daily Task Summary in detail (Only one page)

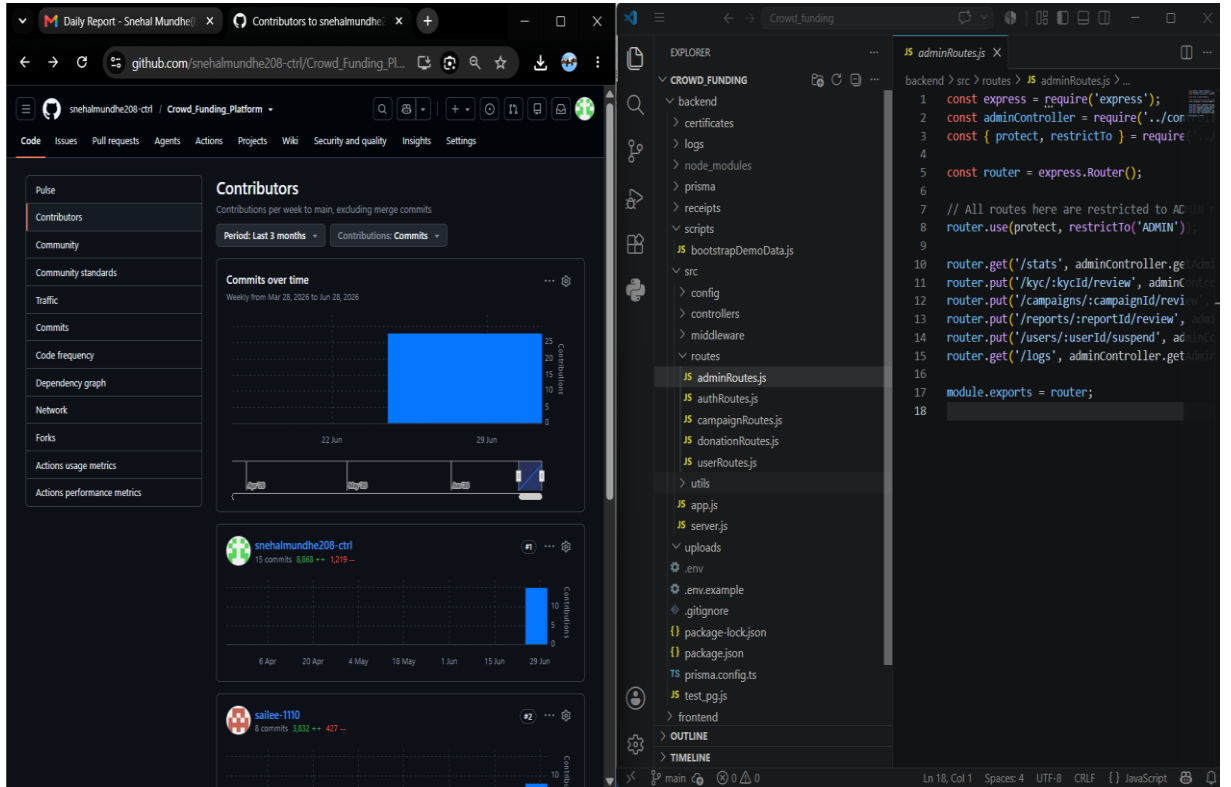

Today, I completed the backend configuration for the Crowdfunding Website by setting up and verifying the essential project files. I worked on the `.env`, `.env.example`, `test_pg.js`, and configuration files to ensure that the backend environment was properly configured and functioning correctly. This included organizing the environment variables, testing the PostgreSQL database connection, and confirming that the application configuration was ready for further backend development. Completing these setup tasks has provided a stable foundation for the remaining backend features.

Along with the backend work, I also focused on improving the user interface and user experience of the Crowdfunding Website. I modified multiple UI and UX elements to make the application more clean, consistent, and user friendly. In addition, I redesigned the existing Figma design by refining layouts, improving the visual structure, and updating several screens to create a more modern and organized design. These improvements will help maintain consistency between the design and the development process while providing a better experience for users.

- Screenshot of you individual work –

The screenshot displays a GitHub repository page for 'snehalmundhe208-ctrl / Crowd_Funding_Platform' on the left and a VS Code editor on the right.

GitHub Repository Page:

- Contributors:** Shows contributions per week to main, excluding merge commits. The period is set to 'Last 3 months'. A bar chart shows contributions over time, with a significant spike in late June 2026.
- Commits over time:** A line graph showing weekly commits from Mar 28, 2026, to Jun 28, 2026. The y-axis represents 'Contributions' (0 to 25).
- Repository Stats:**
 - snehalmundhe208-ctrl:** 15 commits, 8,868 additions, 1,219 deletions.
 - sailee-1110:** 8 commits, 3,632 additions, 427 deletions.

VS Code Editor:

- Explorer:** Shows the project structure with folders like 'backend', 'certificates', 'logs', 'node_modules', 'prisma', 'receipts', 'scripts', 'bootstrapDemoData.js', 'src', 'config', 'controllers', 'middleware', 'routes', and files like 'adminRoutes.js', 'authRoutes.js', 'campaignRoutes.js', 'donationRoutes.js', 'userRoutes.js', 'utils', 'app.js', 'server.js', 'uploads', 'env', 'env.example', '.gitignore', 'package-lock.json', 'package.json', 'prisma.config.ts', 'test_pg.js', 'frontend', 'OUTLINE', and 'TIMELINE'.
- adminRoutes.js:** Contains the following code:

```

1  const express = require('express');
2  const adminController = require('../controllers/adminController');
3  const { protect, restrictTo } = require('../middleware/authMiddleware');
4
5  const router = express.Router();
6
7  // All routes here are restricted to ADMIN
8  router.use(protect, restrictTo('ADMIN'));
9
10 router.get('/stats', adminController.getStats);
11 router.put('/kyc/:kycId/review', adminController.putKycReview);
12 router.put('/campaigns/:campaignId/review', adminController.putCampaignReview);
13 router.put('/reports/:reportId/review', adminController.putReportReview);
14 router.put('/users/:userId/suspend', adminController.putUserSuspend);
15 router.get('/logs', adminController.getLogs);
16
17 module.exports = router;
18
      
```
